Bagian 2. Penjelasan Kode

Penjelasan teknis arsitektur React, konsep *Controlled Component* pada formulir, alur komunikasi *props* & *callback functions*, penggunaan useState untuk array transaksi, serta metode manipulasi array JavaScript (.reduce(), .filter()).

Bagian 3. Screenshot Hasil Antarmuka

Bagian 4. Penjelasan Hasil Antarmuka

Analisis efisiensi antarmuka: sifat interaktif *real-time* tanpa *refresh*, pembeda visual (indikator warna Pemasukan vs Pengeluaran), dan akurasi rekalkulasi total saldo saat transaksi ditambah/dihapus.
